DEPARTMENT OF CSE-

CYBERSECURITY ASSIGNMENT-1

BRANCH CSE-CY

SESSION 2025-26

SEMESTER IV

SUBJECT/CODE: COMPUTER ORGANIZATION & ARCHITECTURE (CSIT-404)

S.No	Question	Bloom's Taxonomy
UNIT 1		
1.	Explain the structure of a desktop computer with a neat block diagram and describe the function of each major unit.	1(Remember)
2.	Explain the general register organization of CPU and describe the role of ALU in instruction execution.	2(Understanding)
3.	Illustrate the concept of Register Transfer Language (RTL) and demonstrate bus and memory transfer operations using suitable	3(Applying)
4.	Analyze the bus structure of a computer system and examine how CPU and memory communicate through system buses.	4(Analyzing)
5.	Evaluate the role of microprogram sequencer and control memory in sequencing and execution of microinstructions.	5(Evaluating)
